SUMMARY

A skilled Web Developer with experience in designing and implementing user-centric web applications. Proficient in React, JavaScript, HTML, and CSS with a strong understanding of the React ecosystem and modern front-end development tools. Also have knowledge about Nodejs Expressjs, MongoDB and Greensock. Looking to apply my skills and experience to a challenging new opportunity as a React Developer.

WORK EXPERIENCE

Conzumex Industries (Musewearables)

React Developer, Bangalore

May 2022 - Present

- Demonstrated ability to design and implement user-centric web applications using **React** and its ecosystem.
- Gained understanding of **JavaScript**, **HTML**, and **CSS** and experience with modern front-end development tools such as webpack and npm.
- Delivered high-quality user interfaces that meet the needs of both business and users. Managed working in Agile development environments and collaborating with cross-functional teams.
- Worked on multiple projects of different size and complexity, and have experience in creating reusable UI components, optimizing the performance and scalability of applications.
- Developed project using **Redux** and **redux toolkit** for the state management. Integrated the React applications with different **APIs** and data sources.

Shopify Developer, Bangalore

Oct 2022 - Present

- Developed **Html** pages for our website.
- Managed shopify customization for our websit.
- Integrated **APIs** to the customized pages and functionalities.

React Developer

Oct 2021 - Apr 2022

Netset software solutions, Mohali, Punjab

- Utilized **React Hooks** and **Functional components** to build the application.
- Integrated with third-party libraries and APIs to handle data fetching and clientside routing.
- Worked closely with the design team and development team to ensure that the user interface was visually appealing, intuitive and accessible by adding various features.
- Participated in code review and helped maintain good coding practices and standards in the team.
- Contributed to the development of a web application using **React** and related technologies like **Redux**. Implemented custom components and hooks, as well as integrating with thirdparty libraries and **APIs**.
- Utilized modern front-end development tools such as webpack, npm, and Git to optimize the development process and ensure code quality.

ACCOMPLISHMENTS

- 65.33% scorer in Interational Humanity Olympiad. SUPER30 Mathematics Olympiad (04/2017)
- Won gold medal, certificate and an educational trip to RUSSIA (MOSCOW) from state HRD Minister.
- Won Gold medal in Football Inter-City matches. (10/2014)

PROJECTS

Muse IOS- dashboard (COMPANY – MUSE WEARABLES)

May 2022 - Dec 2022

The technologies used for making this are Redux, React js, Next js, Node js and PostgreSQL. I am working as the only frontend developer in this project and my task is to create the entire website using the specified technologies. Through this project, I have learnt how to work on Next js, making our website more SEO friendly.

Musehealth (COMPANY – MUSE WEARABLES)

May 2022 - Dec 2022

This project is an initiative to record the users body vitals on our screens using muse-cues (A watch like device tied on the wrists to record the vitals). As a frontend developer I am supposed to fix all the bugs and create the required webpages and features for the product. This dashboard is currently being used in the BMH hospital

Do what you love (COMPANY – NETSET SOFTWARE SOLUTIONS)

Jan 2022 - Apr 2022

This project was an online initiative for maintaining the users health and providing the online suggestions/advicesand supplements. This project is made using React js for the frontend and Node js for the backend. My task as a frontend developer was to create the interactive webpages and add features using react js.

Big4Health (COMPANY – NETSET SOFTWARE SOLUTIONS)

Oct 2021 - Dec 2021

This project was an online initiative for maintaining the users health and providing the online suggestions/advices and supplements. This project is made using React js for the frontend and Node js for the backend. My task as a frontend developer was to create the interactive webpages, integrate APIs, fix bugs and build the required fetures.
